

ABIVIUM™

FEATURES AND BENEFITS

Talc and graphite blend that aids in plantability, formulated with micronutrients and biostimulants.

- Dry powder formulation provides easy on-farm application and adhesion to the seed.
- Provides essential nutrients on the seed for improved plant growth, development and vigor.
- Biostimulants enhance plant cell activity improving germination and tolerance in harsh conditions.

PRINCIPAL FUNCTIONING AGENTS

• Calcium	4%
• Sulfur.....	5%
• Cobalt.....	0.07%
• Copper	0.09%
• Iron	1%
• Manganese	0.7%
• Molybdenum.....	0.08%
• Zinc.....	2%

APPLICATION DIRECTIONS

- Conveniently applied directly to seed as a planter box treatment at planting.
- Corn: 8oz per 100lbs of seed
- Soybean/Alfalfa: 4oz per cwt of seed
- Small Grains: 4 oz/cwt of seed

CROPS

Soybeans Cotton Sugarbeets Wheat Rice Small Grains Corn Milo

PACKAGE SIZE | 25 lb tub | 5 lb pail

Abivium™ is a lubricant and flowability seed treatment fortified with nutritional and biostimulant growth promoters. This improves germination, crop emergence, seedling vigor and plant tolerance under abiotic stress. Equipped with a complete micronutrient package to establish a strong seedling start and a combination of Biostimulants and metabolites protecting plant cell function during harsh environmental conditions. This true talc + graphite blend enables unparalleled seed flowability and placement through most planter delivery systems.
