

# ARTECT™

## FEATURES AND BENEFITS

Fungicide seed treatment for cereals.

- Convenient premix formulated from three proven active ingredients.
- Two chemistries for the control of *Rhizoctonia* and *Fusarium*.
- Excellent control of *Pythium* with additional metalaxyl than the standard rate provides.

Artect™ is a three-fungicide premix seed treatment for wheat, barley, triticale, and oats. This convenient formulation controls and suppresses many common early-season diseases including seed decay, smut activity, *Rhizoctonia spp.* and *Fusarium spp.* This formulation delivers excellent *Pythium* control by using more metalaxyl than the standard rate. Protection created through three key active ingredients, inhibition of sterol biosynthesis, inhibition of RNA biosynthesis, and signal transduction.
