

AVENTINE™

Starter Fertilizer Enrichment

CHS Aventine™ will assure the crop achieves its full yield potential.

- CHS Aventine contains a blend of key nutrients which helps supplement a starter fertilizer program minimizing these key nutrients from being yield limiting factors.
- CHS Aventine is most beneficial when a condition exists that is hampering the availability or uptake of a particular nutrient.
 - Low organic matter/sandy soils
 - Cool/cold soil conditions
 - Stressed soils (saturated or droughty)
 - High pH
 - Excessive phosphorus
 - Excessive rainfall event in spring
- CHS Aventine is formulated with the highest quality ingredients available.
- 2 qt/A of CHS Aventine delivers 1 qt/A of a fully chelated 9% zinc.
- CHS Aventine is compatible with most polyphosphate and orthophosphate fertilizers and is compatible with other fertilizer additives such as CHS Unlocked,™ Avail® and PMax®.
- Analysis: 4-0-5-3S-4.5Zn-1Mn-0.5B
- Typical use rate with starter fertilizer program is 2 qt/A.

Package Size

2x2.5 gal case, 275 gal, Bulk
