

UNLOCKED™

Plant Hormone Supplement

CHS Unlocked™ contains naturally derived Cytokinin, Auxin, and Gibberellic plant growth regulators in the right balance improving growth and development of many crops.

The active ingredients in CHS Unlocked induce cell division, stimulate cell enlargement, delay senescence, overcome apical dominance and improve nutrient mobilization.

The ingredients that are utilized in the CHS Unlocked formulation provide a molecular configuration that is more innately predisposed to “fit” into plant cellular hormone receptors due to its natural derivation. This feature provides quicker uptake and increased activity. CHS Unlocked has vastly increased bioactivity compared to other plant growth regulator products that are synthetically derived.

Compatibility

CHS Unlocked can be blended with most primary, secondary, or micronutrients as well as crop protection products. Add CHS Unlocked to liquid fertilizer and agitate until thoroughly mixed. In the absence of published information, check compatibility by performing a jar test prior to mixing.

Principal Functioning Agents

Cytokinin (as kinetin, Based on bioassay).	0.010%
6-(4-hydroxy-3-methylbut-trans-2-enylamino)-purine N ⁶ -methylaminopurine, N ⁶ -dimethylaminopurine, N ⁶ -isopentenylaminopurine Auxin (Indole-3-butyric acid)	0.005%
Gibberellin (Gibberellic Acid A ₃).	0.004%
Other Ingredients	99.981%
TOTAL	100%

Application Directions

- Apply 0.5-1.0 oz/cwt as a seed treatment on labeled crops such as wheat and soybeans
- Apply 2 oz/A in-furrow on corn (field, sweet, popcorn)
- Apply 4-8 oz/A as a foliar application to labeled crops such as corn, soybeans, sugar beets and wheat

Package Size

2x2.5 gal case

Minimum Storage Temperature

CHS Unlocked will freeze at 32°F. If allowed to freeze, thaw completely prior to use.

Always read and follow label directions.
