

CITRI-AMP™

FEATURES AND BENEFITS

Penetrant ■ Wetting Agent ■ Spreader

- Provides wetting and spreading.
- Increases plant tissue absorption.
- Improves translocation.

ACTIVE INGREDIENTS

- Oxirane, 2-methyl-polymer with oxirane, mono (2-ethylhexyl) ether8.15%
- Constituents ineffective as spray adjuvants.....91.85%
- Total.....100.00%

APPLICATION DIRECTIONS

NOT FOR AQUATIC USE.

Follow the directions on the most restrictive pesticide label. Tank mixtures should only be applied within the label recommendations of every product in the tank mixture. Always test new tank mix combinations before widespread use.

| | |
|-------------------------|----------------------------------------------------|
| Herbicides | 25-100 fluid oz per 100 gallons of spray solution. |
| Defoliant & Desiccants | 32-64 fluid oz per 100 gallons of spray solution. |
| Plant Growth Regulators | 5-10 fluid oz per 100 gallons of spray solution. |

Insecticides, Fungicides, Miticides, Foliar Nutrients

| | |
|-------------------------------------------------------------------------------------|---------------------------------------------------|
| Air-Assisted Sprayers & Conventional Sprayer in Field and Row Crops | 25-64 fluid oz per 100 gallons of spray solution. |
| ULV Equipment Such as Aerial, Electrostatics, Foggers and Misters | 25-96 fluid oz per 100 gallons of spray solution. |
| Chemigation* Through Irrigation Systems Such as Drip, Microjet, Sprinklers or Pivot | 10-20 fluid oz per acre. |

*Not approved in California.

COMPATIBILITY

Citri-Amp is a highly effective surfactant designed for use with insecticides, miticides, fungicides, herbicides, plant growth regulators, defoliant and nutrients. Use Citri-Amp for superior spreading, penetration and uniform distribution. The nonionic chemistry in Citri-Amp enhances the physical and chemical properties of the spray solution and assists in overcoming water repellency of the leaf surface. Citri-Amp may be used with most pesticides, plant growth regulators, defoliant and fertilizer products.

CROPS

PACKAGE SIZE | 2x2.5 gal | 265 gal | Bulk

Citri-Amp™ improves the performance of pesticides and foliar nutrients. Citri-Amp accelerates the movement of the pesticide or nutrient ingredients into and throughout the plant. Citri-Amp adjuvant improves coverage and penetration through the leaf cuticle. Once inside the plant the technology enters the phloem and is then translocated throughout the plant. It can be applied with pesticides and foliar nutrients to improve efficacy.

Do not apply to fruiting stages of pome fruit, cherries, table grapes or other sensitive or stressed crops without first consulting your distributor or representative. Test for compatibility when combining in tank mixes with EC products, copper and/or chlorpyrifos on sensitive crops. NOTE: Citri-Amp reduces dew formation for up to 7 days and therefore may increase the risk of frost damage in frost prone areas.
