

Foliar or soil applied nutrient package.

- Soil or foliar applied nutrient package.

ACTIVE INGREDIENTS

- Total Nitrogen (N)..... 6%
- Sulfur (S)..... 3%
- Boron (B)..... 0.25%
- Iron (Fe)..... 1%
- Manganese (Mn)..... 3%
- Zinc (Zn)..... 2%

Derived from: aqua ammonia, boric acid, iron sulfate, manganese sulfate, and zinc sulfate. Chelated with EDTA and citric acid.

EB Mix® may be used as a foliar or soil applied application to any food or fiber crop where the addition of one or more of the nutrients contained in EB Mix would be beneficial.

When used along with sound agronomic practices, EB Mix will provide needed micronutrients to deliver extra bushels for many crops.

APPLICATION DIRECTIONS

• Foliar

Apply 1-2 qt/A prior to or immediately after deficiency symptoms occur to prevent or alleviate losses from nutrient deficiencies. Spray Carrier (water) volumes of 10-20 gal/A (ground) or 5 gal/A (air) are recommended for best results. When deficiency symptoms are severe, a repeat application of 1-2 qt/A may be needed two or more weeks following the initial application.

• Soil

Apply 1-2 qt/A as a starter fertilizer or as a soil applied broadcast application in a balanced fertility program.

COMPATIBILITY

EB Mix has been shown to be compatible with most pesticides and liquid fertilizers. However, a jar test may be needed to guarantee compatibility due to differences in the quality of specific water sources or specific fertilizers.

CROPS

Soybeans Dry Beans Sugarbeets Wheat Barley Sorghum Corn Sunflowers Potatoes
