

H-Pro 20 Liquid

Fertilizer Additive

Potassium Humate

H-Pro 20 Liquid is a modified potassium humate.

H-Pro 20 Liquid promotes the uptake of micronutrients.

H-Pro 20 Liquid is soluble over a pH range of 2.0 to 12.0. This unique feature allows **H-Pro 20 Liquid** to be mixed and applied with most commercially available fertilizers and micronutrients.

If in doubt, compatibility can be simply checked by:

- Mixing each product in a clear container in the same proportion to be used in the field
- Agitating vigorously for at least 30 seconds
- Visually observing for precipitate

Information regarding the contents and levels of metals in this product is available on the internet at <http://www.aapfco.org/metals.html>

Follow the labeled rates for nutrients and/or consult with your local PCA.

Always consult the Material Safety Data Sheet for instructions on proper handling.

CONTAINS NON-PLANT FOOD INGREDIENTS

GUARANTEED ANALYSIS:

Humic Acids (derived from leonardite)20%

Total Other Ingredients (water, potassium (derived from potassium humate and potassium hydroxide) and humins derived from leonardite) 80%

Humic acids determined by BaCL2 Method

“NOT A PLANT FOOD PRODUCT”

GUIDELINES FOR USE:

H-Pro 20 Liquid can be applied to all crops including fruits, vegetables, potatoes, trees, vines, flowers, ornamentals, turf, grain and other row crops.

Application rates and frequency are dependent upon soil and climate conditions present. Typical application rates range from 2 quarts to 8 gallons per crop per acre per season.

H-Pro 20 Liquid may be applied alone or with liquid fertilizers.

H-Pro 20 Liquid may be applied through conventional methods but not limited to foliar spray, soil application, drip irrigation, water run, shanking in or hydroponically.

Contact your CHS Inc Sales Representative for additional information.
