

# H-PRO 20

## FEATURES AND BENEFITS

### Modified Potassium Humate

- Robust root development.
- Aids in stress mitigation.
- Stimulates microbial activity.
- Natural complexing agent helps nutrient utilization.

### ACTIVE INGREDIENTS

- Humic Acids (derived from Leonardite)
- Soluble potash ( $K_2O$ )

### APPLICATION DIRECTIONS

- H-Pro 20 can be applied in furrow, 2 x 2, foliar, and drip irrigation on any crop at 2-6 quarts/acre/application.

### COMPATIBILITY

H-Pro 20 has superior mixing and handling characteristics. H-Pro 20 has a pH of 9.0 and is soluble over a pH range of 2.0 to 12.0. This unique feature allows H-Pro 20 to be mixed and applied with most commercially available fertilizers and micronutrients. Compatibility test is still recommended.

H-Pro 20 aids in root development, stress mitigation, and seed germination. This product also stimulates microbial activity.

H-Pro 20 increases nutrient exchange and retention which improves nutrient absorption and provides greater overall plant health.

### CROPS

Soybeans Dry Beans Sugarbeets Wheat Barley Sorghum Corn Sunflowers Potatoes

All row crops including fruits, vegetables, trees, vines, flowers, ornaments, turf, and grain.

PACKAGE SIZE | 2x2.5 gal | 275 gal
