

Solution chelated with ortho-ortho EDDHA designed for use in most soil applied fertilizers.

- Makes phosphorus, zinc and other key micronutrients more available to the plant.
- Enhanced nutrient availability increases early growth, overall plant health, and ultimately yield.
- Has three modes of action: it unlocks nutrients in the soil, it allows the nutrients to be more available, and is mobile in the plant for season-long activity.

### ACTIVE INGREDIENTS

- Total Nitrogen (N)..... 2%
  - 1.5% Urea Nitrogen
  - 0.5% Ammoniacal Nitrogen
- Derived from: urea and ortho-ortho EDDHA.

### APPLICATION DIRECTIONS

- For use as or with an in-furrow starter fertilizer.  
Apply 32-64 oz per acre alone or added to an existing phosphorus-based in-furrow starter fertilizer program.

### COMPATIBILITY

Levesol® can be blended with most primary, secondary, or micronutrients as well as crop protection products. Add Levesol to liquid fertilizer and agitate until thoroughly mixed. In the absence of published information, check compatibility by performing a jar test with each new fertilizer type and batch prior to mixing. Mix only the amount of Levesol with starter fertilizer that can be used within a day.
