

LIQUID AMS

Quality source of liquid ammonium sulfate.

ACTIVE INGREDIENTS

- Ammonium sulfate 34%
- Constituents ineffective as spray adjuvants 66%
- Total 100%

APPLICATION DIRECTIONS

• FOR GLUFOSINATE:

Use Liquid AMS at a rate of 3.5-7 pt/A to provide the equivalent of 1.5-3 lb/A. Add according to the directions on the pesticide label. Weed type, weed height, environmental conditions and other factors can impact use rate needed. Do not premix with concentrated oil or lecithin products. Add each product separately.

• FOR GLYPHOSATE:

Use Liquid AMS at a rate of 2.5-5 gal/100 gal to provide the equivalent of 8.5-17 lb/100 gal. Add according to the directions on the pesticide label. Weed type, weed height, environmental conditions and other factors can impact use rate needed. Do not premix with concentrated oil or lecithin products. Add each product separately.

Liquid AMS is a convenient 3.4 lb/gal liquid formulation of ammonium sulfate.

Liquid AMS is designed for use with glyphosate, glufosinate and other pesticide formulations that require ammonium sulfate.
