

MICRO PAK

FEATURES AND BENEFITS

Micronutrient Blend

- **Micronutrient blend of key nutrients chelated with EDTA to broaden its compatibility with starter fertilizers and pesticides. The addition of Micro Pak can alleviate key micronutrient deficiencies.**

GUARANTEED ANALYSIS

• Total Nitrogen (N).....	4.0%
2.0% Ammoniacal Nitrogen	
2.0% Other Water Soluble Nitrogen	
• Soluble Potash (K ₂ O).....	5.0%
• Sulfur (S).....	3.0%
3.0% Combined Sulfur (S)	
• Boron (B).....	0.5%
• Manganese (Mn).....	1.0%
1.0% Chelated Manganese (Mn)	
• Zinc (Zn).....	4.5%
4.5% Chelated Zinc (Zn)	

Derived from potassium thiosulfate, manganese EDTA, zinc EDTA, boric acid, aqua ammonia and ethylenediaminetetraacetic acid.

- Micro Pak is most beneficial when a condition exists that is hampering the availability or uptake of a particular nutrient.
 - Low organic matter/sandy soils
 - Cool/cold soil conditions
 - Stressed soils (saturated or droughty)
 - High pH
 - Excessive phosphorus
 - Excessive rainfall event in spring
- Micro Pak is formulated with the highest quality ingredients available.
- 2 qt/A of Micro Pak delivers 1 qt/A of a fully chelated 9% zinc.
- Micro Pak is compatible with most polyphosphate and orthophosphate fertilizers and is compatible with most other fertilizer additives.

APPLICATION DIRECTIONS

- Typical use rate with starter fertilizer program is 1-2 qt/A.
- Typical use rate with post-emergent pesticides is 1 qt/A.
