

# MOXON™ B

## FEATURES AND BENEFITS

Foliar ortho-ortho EDDHA chelated Micronutrient.

- Equipped with the patented Levesol® chelate to provide better nutrient availability.
- Choose from two critical micronutrients essential for plant development and yield outcome.
- Convenient use rate and easy handling.

## PRINCIPAL FUNCTIONING AGENTS

3-0-0, 7.5 B, 0.1 Zn, O,O EDDHA

## APPLICATION DIRECTIONS

- Application Directions: Apply 1-4 pt as a foliar application to prevent or alleviate B deficiency.

## COMPATIBILITY

Compatible with most pesticides and nutrients.

Moxon™ B is a 7.5% foliar boron equipped with the patented Levesol chelate. Boron is highly responsive in row crops and is a major component in the grain development process for crops. The Levesol chelate works synergistically to increase nutrient availability and translocation into the plant.

## CROPS

Soybeans

Dry Beans

Sugarbeets

Wheat

Cotton

Rice

Corn

PACKAGE SIZE | 2x2.5 gal | 125 gal | 250 gal
