

# N-ERTIA™ B

## FEATURES AND BENEFITS

### Slow Release Nutrition

- Highly effective source of foliar slow release nitrogen in a low salt formulation for excellent plant safety.
- Supplements and increases nitrogen efficiency in the plant.

N-Ertia™ B contains a low salt, highly efficient source of nitrogen that is intended to improve nitrogen use efficiency while increasing crop yields. This formula may allow for more complete and rapid nitrogen absorption while aiding in the uptake and translocation of other tank mixed nutrients.

N-Ertia B may be applied as a foliar spray on a wide array of agricultural crops to correct nitrogen deficiencies and/or improve growth.

N-Ertia B contains 2.6 lb of nitrogen per gallon.

The addition of Boron in N-Ertia B may improve and increase cell wall formation, pollination and formation of reproductive components such as grain yield and weight.

## GUARANTEED ANALYSIS

- Total Nitrogen (N).....25.0%
  - 16.85% Urea Nitrogen
  - 8.15% Other Water Soluble Nitrogen\*
- Boron.....0.5%
  - 0.5% Water Soluble Boron

Derived from: Urea, Urea-Triazone Solution and Boric Acid.

\*8.15% Slowly Available Nitrogen from Urea-Triazone Solution.

## APPLICATION DIRECTIONS

- Use in accordance with recommendations of a qualified individual or institution, such as, but not limited to, a certified crop advisor, agronomist, university crop extension publication, or apply according to recommendations in your approved nutrient management plan.

### COMPATIBILITY

N-Ertia B is completely water soluble and can be custom blended with other primary, secondary and micronutrients as well as many crop protection chemicals. In the absence of published data, check compatibility by performing a jar test prior to tank mixing. N-Ertia B should not be blended with strongly acidic materials.

## CROPS

PACKAGE SIZE | 250 gal | Bulk
