

# POTASSIUM 19

## FEATURES AND BENEFITS

- In-furrow, soil or foliar applied nutrient package

## GUARANTEED ANALYSIS

GRADE 0-0-19

- Soluble Potash ( $K_2O$ ).....19%
- Sulfur (S).....6%

Derived from: potassium acetate and potassium thiosulfate.

## APPLICATION DIRECTIONS

### • In-Furrow

Add 2-4 qt/A of Potassium 19 to phosphate starter fertilizer

### • Foliar

Soybeans: Apply 1-2 qt/A at R2 to R3

Alfalfa, hay and other forages: Apply 2-4 qts/A after spring green up, and after each cutting

Corn, field and sweet: Apply 1-2 qts/A at V4-V6 and repeat prior to or at tassel

Cotton: Apply 2-4 qt/A at early to late boll set

Dry edible beans, peas and other legumes: Apply 1-2 qt/A at early bud and repeat after bloom

Potato: Apply 0.5 to 3 gal/A at tuber set and repeat every 2-4 weeks

Small grains such as barley, oats, wheat and rice: Apply 1-2 qt/A at tillering. Repeat at flag leaf if necessary

### Mixing and Compatibility:

Potassium 19 is compatible with many nitrogen and phosphate fertilizers as well as many crop protection products. Due to variability in these products, a jar test is always recommended prior to use. Micronutrient products not 100% chelated may not be compatible.

## CROPS

Soybeans

Dry Beans

Sugarbeets

Wheat

Barley

Sorghum

Corn

Sunflowers

Potatoes

Potassium 19 may be used as an in-furrow, foliar or soil applied application to any food or fiber crop where the addition of potassium or sulfur contained in Potassium 19 would be beneficial.

When used along with sound agronomic practices, Potassium 19 will provide additional potassium and sulfur to increase yields in many crops.
