

PRECINCT™ 2

FEATURES AND BENEFITS

Water Conditioning Agent ■ Wetting Agent

- Quality combination of ammonium sulfate and surfactant.
- Improved spreading and pesticide uptake.
- Reduction of hard water interactions with pesticides.

Precinct™2 is a blend of surfactants and ammonium sulfate provided as one convenient, multifunctional liquid.

Precinct2 is designed for use with glyphosate, glufosinate and other pesticide formulations that require the combination of ammonium sulfate and surfactant.

Increased pest control is achieved by the combination of improved spreading and uptake, provided by the surfactant, and reduction of hard water interaction and enhanced uptake, provided by the ammonium sulfate.

10 qt of Precinct2 provides the equivalent of 8.5 lb of ammonium sulfate and 2 qt of a nonionic surfactant.

PRINCIPAL FUNCTIONING AGENTS

- Ammonium sulfate, sodium xylene sulfonate, alkyl polyglucoside and inert ingredients.....100.00%

APPLICATION DIRECTIONS

- Use Precinct2 at a rate of 3-10 qt/100 gal of tank mix. Add according to the directions on the pesticide label. If no directions are given, use the table below as a general guide for glyphosate applications. Weed type, weed height, environmental conditions and other factors can impact use rate needed. Do not premix with concentrated oil or lecithin products. Add each product separately.

Glyphosate Herbicide Surfactant Load	Water Hardness In PPM	Quarts Of Precinct2 Per 100 Gallons Of Tank Mix
FULL	<250	3-4
	250-500	4-6
	>500	6-10
PARTIAL	<250	7-8
	>250	8-10
NONE	ANY	10
