

CHS RAPID UP™

Bean Mix

CHS Rapid Up™ Bean Mix is a premium foliar mix that is used to provide several vital micronutrients to soybeans and other crops. The balanced formula contains boron, iron, manganese and sulfur in levels that improve yield and repairs damage from herbicide sprays.

1. Foliar fertilization is intended as a supplement to a regular fertilizer program and will not by itself, provide all the nutrients normally required by agriculture crops.
2. Nitrogen breakdown is 3.00% ammoniacal and 2.00% urea nitrogen.

Application Directions

1. General Application

Typical application rate is 2-5 lb of Bean Mix per acre applied as a foliar spray during the early vegetative stage (V-3 to V-6) of the plant. Additional applications may be made if signs of manganese deficiency are evident. Soil test or tissue tests should be used as a base reference.

2. Mixing Sequence

Mixing sequence must be Bean Mix first, ammonium sulfate or other compatibility agent and lastly any other product. (Each product must be allowed to mix completely before the addition of the next).

Package Size

25 lb bags

Always read and follow label directions.
