

REVIVAL™

Combination of ingredients that help plants survive in periods of water-related stress.

Grade 0-1-1

Guaranteed Analysis:

Available Phosphate (P₂O₅) 1.0%
Soluble Potash (K₂O) 1.0%
Derived from Tripotassium Phosphate

WARNING

KEEP OUT OF THE REACH OF CHILDREN, PETS AND LIVESTOCK

Causes serious eye irritation.

Refer To Safety Data Sheet (SDS) For Important, Environmental, Safety, and Health Information

CAUTION: This material should only be used as recommended. It may prove harmful when misused.

- Avoid contact with eyes
- Avoid contact with skin
- Avoid breathing fumes or spray mist
- Do not swallow
- Wash thoroughly after handling

First Aid: In the event of eye and/or skin contact - flush affected areas with large quantities of plain water. If irritation persists seek medical attention.

Personal Protective Equipment: Wear gloves and protective clothing. Wear eye protection (glasses, goggles or face shield)

Information regarding the contents and levels of metals in this product is available on the internet at <http://www.aapfco.org/metals.html>

GENERAL INFORMATION

Revival™ is a combination of chemical compounds that improve transpiration, water use efficiency and stomata control by helping plants continue to grow after periods of stress.

DIRECTIONS FOR USE

Shake well before use. Apply to foliage with or without tank mixtures at a rate of 3.2 fl oz/acre and use 10 gallons/acre of water as a carrier. Revival contains a surfactant, no additional surfactants are needed prior to application. If mixed with any fungicide, herbicide or insecticide, use recommended carrier rate for the tank mix as described by the manufacturer and test mixes in a jar prior to use.

SPRAY TIMING: Apply V3-V6 or R1-R3 for soybean, V4-V7 or VT post pollination for corn, vegetative for sugar beets, vegetative or first boll for cotton, before first cut or 7-10 days after cutting for alfalfa and at bloom for most other crops and vegetables.

COMPATIBILITY: Revival is non-phytotoxic and compatible with most commonly used foliar treatments including insecticides, fungicides, micronutrients, zinc, and biostimulants. Pilot test compatibility of all chemical mixes.

STORAGE & DISPOSAL

Store optimally at temperatures between 33°F and 100°F. If allowed to freeze, thaw completely prior to use. Under these conditions Revival will remain viable for 24 months. When stored for prolonged periods above 100°F, Revival slowly loses its efficacy and will be viable for less than 24 months. Keep packaging closed, securely fastened and upright. Triple rinse or equivalent and dispose of container in accordance with local, state and federal regulations.

Conditions of Sale and Warranty Limitation: The Directions for Use of this product reflect the opinion of experts based on field use and tests. The directions are believed to be reliable and should be followed carefully. However, it is impossible to eliminate all risks inherently associated with use of this product. Crop injury, ineffectiveness or other unintended consequences may result because of such factors as weather conditions, presence of other materials, or use of the product in a manner inconsistent with its labeling, all of which are beyond the control of CHS Inc. or the seller. All such risks shall be assumed by the buyer. CHS Inc. warrants that this product conforms to the chemical description on the label and is reasonably fit for the purposes referred to in the Directions for Use, subject to the inherent risks referred to above. CHS Inc. makes no other express or implied warranty of fitness or merchantability or any other express or implied warranty. In no case shall CHS Inc. or the seller be liable for consequential, special or indirect damages resulting from the use or handling of this product. CHS Inc. and the seller offer this product, and the Buyer and the User accept it, subject to the foregoing Conditions of Sale and Warranty, which may be varied only by agreement in writing signed by a duly authorized representative of CHS Inc.
