CUSTOMIZED SEED TREATMENTS. TAILORED FOR SUCCESS.

Agriculture is about results. That means suboptimal solutions are not an option. STI Customized seed treatments provide tailored protection against environmental and pest pressures to optimize yields.

With over 13,000 possible blends for various crops, these sustainable and cost-effective treatments are computer-controlled for precision. With STI Customized, retailers can choose from many leading chemistries to create a perfect combination of treatments that meet specific needs.

Soybean

Wheat

Peas

Lentils

Potatoes

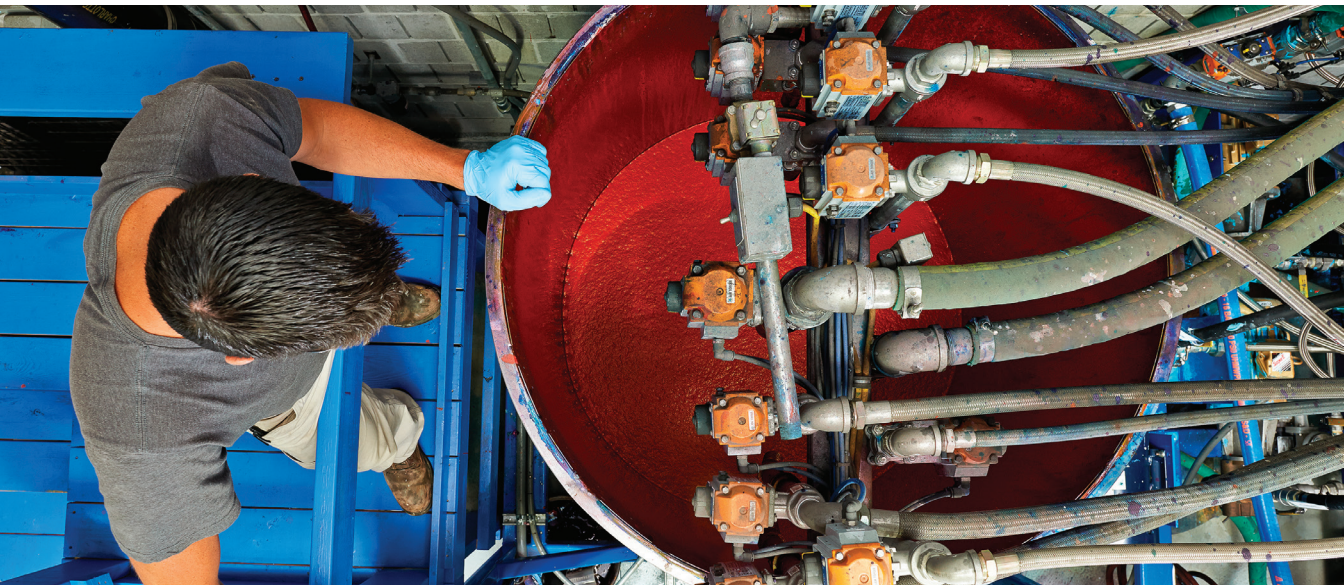

Cotton

A FORMULA FOR EVERY FIELD.

Every seed treatment begins with an assessment from a CHS representative. They will consider agronomics, economics and crop appearance to determine a recommended approach.

If a custom blend is chosen, the CHS team will get to work developing a custom formula.

THE SEED TREATMENT PROCESS

1 SELECT TREATMENT COMPONENTS
after consulting with a CHS representative

2 SELECT PACKAGE SIZE
• 30-gallon*, 120-gallon, and 260-gallon
• 15-gallon* and 30-gallon*
• 15-gallon* ss kegs
* when available & time permitting

3 SELECT SLURRY RATE AND COLOR

4 BLEND IS SHIPPED
Upon determining the formula, the custom blend will be shipped out
