

UPLAND™ MSO

FEATURES AND BENEFITS

Modified vegetable oil concentrate.

- Quality blend of methylated soybean oil and surfactant emulsifiers.
- Enhanced leaf penetration provides greater herbicide activity.
- Low-foam formulation offers a greater ease of use.

Upland™ MSO is a blend of methylated soybean oil and surfactant emulsifier specifically designed for use with postemergence herbicides.

Upland MSO is a low-foam methylated seed oil that provides excellent leaf penetration which will provide greater herbicide activity than traditional oil adjuvants.

ACTIVE INGREDIENTS

- Methylated seed oil..... 90%
- Emulsifying agents.....10%

APPLICATION DIRECTIONS

- Upland MSO should be applied at rates recommended on the herbicide label. Typical use rates will be 1.5-2 pt/A or 1% v/v.
