

VERACITY® ELITE II

FEATURES AND BENEFITS

Ammonium Sulfate Free Water Conditioner ■ Nonionic Surfactant
Drift Reduction Agent ■ Deposition Aid ■ Antifoam

- All-in-one adjuvant.
- Unparalleled low use rate.
- Ensures on target application, mitigating risk for your ease of mind.

PRINCIPAL FUNCTIONING AGENTS

- 2-hydroxypropane-1,2,3 carboxylate, complex trihydric alcohols, oligomeric sugar alcohol condensat 34.75%
- Constituents ineffective as spray adjuvants..... 65.25%
- TOTAL..... 100%

APPLICATION DIRECTIONS

• Approved Dicamba Chemistry

Consult dicamba product approval website for list of approved tank-mix partners.

- Approved dicamba herbicide at labeled use rate
- Approved pesticide tank-mix partner at labeled use rate
- Veracity Elite II at 5 pt/100 gallons of water

• With Glyphosate

- Glyphosate herbicide at labeled use rate
- Conventional tank-mix partner at labeled use rate
- Veracity Elite II at 4 pt/100 gallons of water

Consult pesticide labels for product use rates, instructions and proper mixing order.

Veracity® Elite II contains nonionic surfactants, water conditioning agents, deposition and drift management aids and defoamer. The unique combination of functioning agents improves the performance of glyphosate, dicamba and many other herbicides that require or recommend surfactant, water conditioning, deposition and drift management as well as reducing foam in the spray tank.

Veracity Elite II does not contain ammonium sulfate or acidify the spray solution but uses a proprietary water conditioning system that is compatible with a wide array of herbicides including those that contain glyphosate, dicamba, and many others. Humidome trials with Veracity Elite II have demonstrated minimal or no impact on increased dicamba volatility. Wind tunnel trials with Veracity Elite II have demonstrated reduced fine droplet formation from most pesticide spray solutions.
